A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
SOC received an alert about a possible phishing attempt, an email containing a malicious executable file was sent to the company's HR disguised as a job applicant resume. The file hash was previously analyzed to be indeed malicious. Ticket status has been shifted from investigating to escalated to notify level-two soc analyst, because the email contains a malicious executable file that spreads malware and initiates backdoors inside a system.

Additional information

Known malicious file hash:
